MARTA SÁNCHEZ LUENGO

Marta S. Luengo was born in 1972, in Madrid. She was graduated in Arts specialize in sculpture at Complutense University in Madrid. Since then, she has been developing her career with exhibitions in galleries, public entities and contemporary Art Fairs, both in Spain and abroad.

Her work has been awarded in a variety of national contests, underlining her monumental sculpture Project "Making your way". Her artistic production is in public and private collections: Lease Plan Services, Museum of the Spanish National Blind Organization - ONCE, Leon Cathedral Artistic Heritage or the Egyptian Embassy in Madrid.

The most remarkable about her work is her scope of the human being through different realities. The study of the human figure and its context play the same role on her sculptures. The creation and use of scene is always constant on her work, and it becomes the canvas for referring about the complexity of the circumstances the human being is involved, integrating social-urban with intimate-personal life.
